(54) Title: **SYSTEM FOR PROVIDING TIME DEPENDENT CONDITIONAL ACCESS**

(57) Abstract: A source transmits (10) successive keys encrypted in encryption control messages and information in an encrypted form that is successively decryptable with the successive keys. A decoder (122) decrypts the information. A secure device (14) receives the encryption control messages, decrypts the keys from the messages and supplies the keys to the decoder (122). The secure device (14) maintains a time value. The secure device (14) controls the supply of the keys dependent on the time value, and increments the time value in response to reception of respective ones of the encryption control messages.

* Special categories of cited documents:

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- *G* document member of the same patent family
